Subject: stop attacking Microsoft

The Clinton Administration started attacking Microsoft which led to the current bear market we are currently struggling to get out of. It's a crock of ca-ca that the Reno Justice Department used Microsoft products as a tool to attack Microsoft. Why, because Microsoft is a leading innovator. Lead, follow or get out of the way as Lee Iacocca said of Chrysler. I have personally enjoyed and profitted from Microsoft products and I stand behind the company all the way. Microsoft is what the American dream is all about. Make a product people need/want, market it, and advance an industry, a nation. Bill Gates did for computers what Henry Ford did for the car. Innovation must be allowed to reign free.

Release Microsoft from the anti-trust suit and let free competition rule!
